CNC Machinist

2/7/2017

Andron Stainless is looking for an experienced CNC Lathe machinist. Daily activities will include programming, set up, and operating CNC Lathes. Knowledge of CNC Mills a plus. Equipment being used is Haas Toolroom Lathe and Mill, Milltronics Lathe, and a Daewoo Lathe.

Candidate will be responsible for writing a program from a blue print, setting up the machine and tooling, and running the machine to produce the finished part. He/she will ensure all gauging and equipment is in proper working order.

The successful candidate will have knowledge and experience with G code and conversational programming, blue print reading, steel rules, dial calipers, micrometers, height gauges, indicators, & bore gauges, general math skills, tooling knowledge and machine set up.

Climate controlled environment. Excellent benefits and competitive salary based on qualifications.
